Dear Readers,

We are delighted to present this latest issue of Scientia Review, bringing together a collection of articles that reflect recent developments and practical innovations in agriculture and allied sciences. The contributions in this issue cover a wide range of topics, including crop nutrition, agricultural policy, sustainable aquaculture, artificial intelligence in farming, food security and floriculture.

The articles aim to provide scientifically sound and practically relevant information that can support researchers, students, extension professionals, policymakers and farming communities in addressing contemporary challenges while promoting sustainable agricultural development.

We sincerely appreciate the efforts of our authors for sharing their valuable knowledge and our reviewers for their constructive evaluations, which have helped maintain the quality of this publication. We hope this issue serves as a useful source of information and inspires further learning, innovation and collaboration in the agricultural sector.

Thank you for your continued support and we wish you an informative and enjoyable reading experience.

With best wishes,

(P.K. Bordoloi)
