Scientia Review is a multidisciplinary scientific e-magazine published by the Scientia Academic Advancement Foundation (SAAF). It provides a dynamic platform for researchers, academicians and professionals to share knowledge and innovations across diverse fields of science and technology. The magazine is dedicated to promoting quality academic writing, fostering scientific awareness and encouraging collaboration between established experts and emerging scholars.

7	Integrated Farming System with Duck Farming: A Sustainable Livelihood Model from Udalguri District <i>By P. Rajbongshi, K. D. Nath, D. Sharmah and D Borah</i>	16-17

Dear Readers,

Science continues to shape a sustainable future by transforming innovative ideas into practical solutions for society. The present issue of Scientia Review brings together contributions centred on digital agriculture, renewable energy, medicinal plants, seed systems and integrated farming approaches, reflecting the growing role of science in promoting sustainable agriculture and rural development.

Digital extension services, the health and production potential of garden rue, clean hydrogen production from dairy waste, the SATHI initiative for quality seed delivery and integrated pig-fish and duck-based farming systems collectively demonstrate how innovation, research and field-level interventions can strengthen livelihoods, improve resource use and support resilient farming communities.

We sincerely thank our authors, reviewers and members of the Editorial Board for their valuable contributions and continued commitment to maintaining the quality of Scientia Review. We are equally grateful to our readers for their continued support and encouragement.

We hope this issue encourages scientific thinking, promotes the exchange of knowledge and inspires wider adoption of sustainable technologies and practices. We warmly invite researchers, academicians, professionals and students to contribute their valuable work to our forthcoming issues.

Warm Regards,

Editor-in-Chief
