

SCIENTIA REVIEW

An open access international e-magazine

Vol. 2, Issue 10
October 2026

ISSN 3107-7919

Scientia Review is a multidisciplinary scientific e-magazine published by the Scientia Academic Advancement Foundation (SAAF). It provides a dynamic platform for researchers, academicians and professionals to share knowledge and innovations across diverse fields of science and technology. The magazine is dedicated to promoting quality academic writing, fostering scientific awareness and encouraging collaboration between established experts and emerging scholars.

Sl.	Title of the Article	Page
1	Edible Insects for Future Food Security: Potential and Challenges <i>By Dharani G, A. K. Biswas, Namrata Agrawal, Shruti Patel and Triksa R. S.</i>	1-4
2	Ayurveda, Yoga and Traditional Health Sciences: Integrating Traditional Knowledge with Modern Research <i>By Ganesh Shrirang Nale</i>	5-15
3	Fetomaternal Disproportion as a cause of Dystocia in Bovines and its Obstetrical Management <i>By A. Thangamani, B. Vigneshwaran, A. Sabarinathan, V. Prabakaran and A. Elango</i>	16-18
4	Biofertilizers in tropical and subtropical fruit crops: mechanisms, field evidence and constraints in Asian orchard systems <i>By Ridhima and Jatinder Singh</i>	19-33
5	From Soil to Sustainability: The Promise of Natural Farming <i>By Sudhanshu Ranjan, Pankaj Nautiyal, Satish Yadav and Thanga Anusya S</i>	34-39
6	Grafting: A sustainable approach for nematode management in solanaceous vegetables <i>By Ranjit Chatterjee and Mamoni Deori</i>	40-43
7	Light pollution and its cascading effects on global ecosystems <i>By Varsha Kumari, Anita Kumari, Renu Munjal, Vishal Kathuria and Anushree Jatrana</i>	44-46
8	Understanding Small Hive Beetle Biology and Strategies for its Prevention and Management <i>By Nawazish Ahmad, Vivek Kumar, Ramanuj Vishwakarma, Md Jawed Alam and Rishabh Kumar</i>	47-50
9	Swachh Bharat Mission and Swachhata Pakhwada 2026: The Role of Krishi Vigyan Kendras <i>By Kapil Deb Nath, Pranabesh Barman, Pradip Rajbongshi, Pallavi Deka and Himadri Rabha</i>	51-53
10	Smart Farming and Modern Agricultural Technologies <i>By I. Venkata Reddy, M. Ravi Kishore, T. Jeswanth Reddy and P. N. Siva Prasad</i>	54-57
11	How Biochar Contributes to Sustainable Agriculture: Impacts on Soil Health, Crop Productivity, Resource-Use Efficiency and Carbon Sequestration <i>By Khushi Kumari, Krishna Kaushik</i>	58-63
12	Harnessing Isotope Analysis for Wood Identification: Techniques, Applications and Future Directions	64-70

CONTENTS

	<i>By Clara Manasa P A, Deepthi Dechamma N.L. and Nandhakumar S</i>	
13	Vanishing Darkness: How Artificial Light at Night is Badly Rewiring the Aquatic Ecosystems <i>By Ehtesham Hussain, Irshad Ahmad and M. Junaid Sidiq</i>	71-76
14	A longer day for a breathing planet: how Earth's slowing spin may have helped oxygen fill the air <i>By Wang Yuanqi, Wang Ziyang, Wang Yu and Wang Zhiyuan</i>	77-81
15	Livestock 2.0: Harnessing the CRISPR-Cas9 Toolbox to Secure Global Food Systems <i>By Triksha R S, Sagar Chand, Govarthanan P and Dharani G</i>	82-86
16	Microplastics in Soil: An Emerging Threat to Soil Health and Food Safety <i>By Rakesh Sharma, Sumana Balo and Anshuman Das</i>	87-91

Dear Readers,

Science is closely connected with the way we grow food, protect our environment and improve our lives. Agriculture today is moving towards better use of technology, natural resources and traditional knowledge. At the same time, new challenges such as climate change, environmental pollution, pests and the need for sustainable food production require fresh ideas and practical solutions.

This issue of *Scientia Review* brings together articles that reflect these changing needs. From smart farming and natural farming to biofertilizers and grafting, the contributions highlight different approaches for making agriculture more productive and sustainable. The issue also looks beyond agriculture, covering topics such as light pollution, honey bee pests, traditional health practices and edible insects as a possible source of future food.

Together, these contributions show that scientific progress does not always mean replacing existing knowledge. In many cases, it means improving traditional practices with new knowledge and technology and finding practical ways to address present challenges.

We sincerely thank all the authors and reviewers for their valuable contributions and continued support. We hope this issue will provide useful knowledge, encourage new ideas and inspire further research.

Warm Regards,

Editor-in-Chief
